

Parent Access to PowerSchool

Go to www.spokaneschools.org

Click on “Quick Access” on the left

Click on “Parents” also on the left

Click on “PowerSchool” on the right (sometimes at the bottom of the page)

Click “Create Account”

Click “Create Account” again 😊

On the next screen under Create Parent Account

This is all about you, the parent/guardian – enter your name, your email, and create a username and password you will remember. **NOTE: It is case sensitive.**

Under Link Students to Account (at the bottom of this screen)

Enter the Student Name

Enter Access ID provided by the school

Enter Password also provided by the school

Choose the Relationship – i.e. parent, step-parent, grandparent, etc.

NOTE: Only enter 1 student at a time. If you have more than one student, you will include them after this process is complete.

Scroll down to the bottom of the page and “Enter”

This will take you back to the login page where you will “Sign In” using the username and password that you created. *(The access ID and password provided by the school are keys to hook you to an account, but they do not actually let you login.)*

Once you have successfully created an account and are logged in, you will select “Preferences” to add another student. You will need the correct access ID and password provided by the school for each student you want to add. Once it is all set up, you only need one log in to see all students.
